**Step 5:** The group is assigned a telephone number and text messages may now be sent.

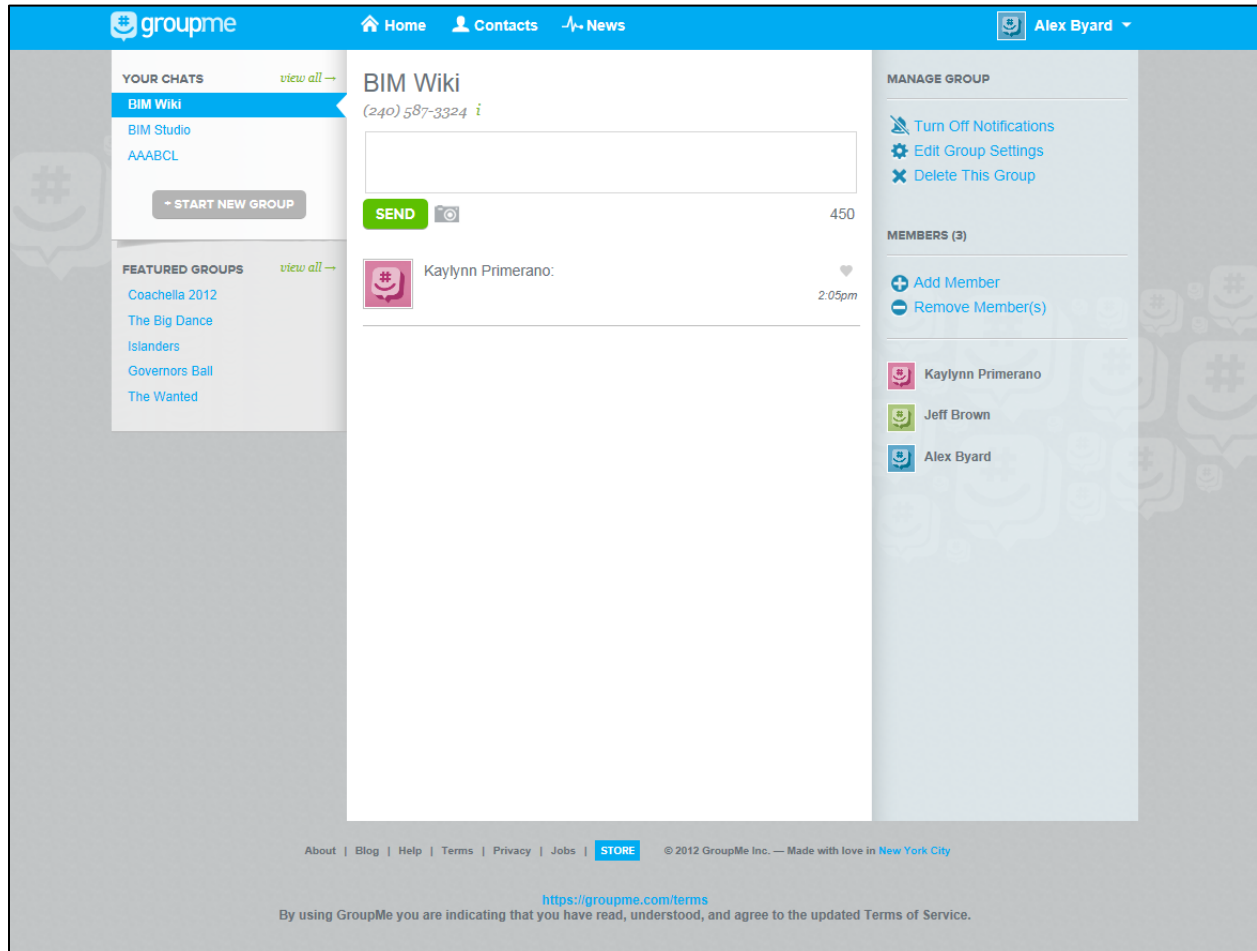

Image 5 Text messages may now be sent

*groupme* is a useful tool to help coordinate team meetings, keep all members informed of changes, and to quickly obtain information from other team members. When one group member sends a text message, all other members receive it simultaneously. Simply send a text to the telephone number provided by *groupme* and the team is in constant contact. The service is free of charge for all mobile telephone carriers, and has a free iPhone and Android application.
